

Features

- Mounts 4" or 4-11/16" electrical boxes or plaster rings for low-voltage applications
- Fits 2-1/2", 3-5/8" and 4" deep studs
- For 6" deep studs combine the TEB6XT and the TEB23
- Designed with two far-side supports for added stability
- Feet on the far-side supports help prevent damage to the drywall
- Easily identify mounting orientation of electrical boxes. Round keyholes for 4-11/16" boxes and octagonal keyholes for 4" sq. boxes
- Can be mounted to stud on all four sides
- Box locking tabs securely lock electrical boxes in place to prevent disassembly during shipment

The TEB23 bracket, part of the CADDY® line of fasteners from ERICO, offers an easy-to-install method for mounting boxes or plaster rings in low-voltage applications.

Two far-side supports provide increased stability after installation. The supports also have feet to help prevent damaging the drywall.

The TEB23 features round and octagon-shaped keyholes to quickly and easily identify the location of the electrical boxes. Box locking tabs securely hold the electrical boxes in place to prevent disassembly during shipment. To benefit both the installer and pre-fabricator, the TEB23 can be mounted from any side of the bracket.

Part Number	Description	Standard Packaging Quantity
TEB23	Electrical box bracket for 2-1/2" or 3-5/8" stud depth	50
TEB4	Electrical box bracket for 4" stud depth	50
TEB6XT	Electrical box bracket for 6" stud depth	100

WARNING

ERICO products shall be installed and used only as indicated in ERICO's product instruction sheets and training materials. Instruction sheets are available at www.erico.com and from your ERICO customer service representative. Improper installation, misuse, misapplication or other failure to completely follow ERICO's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death.
