The Intersystem Bonding Termination (IBTB), part of the ERITECH® line of Facility Electrical Protection products, is designed to meet the requirements of the 2008 NEC® Article 250.94 “Bonding for Other Systems.” The IBTB is mounted adjacent to the meter base or service entrance equipment and is a convenient way to interconnect and terminate grounding conductors from telephone, CATV or radio and television antennas.

The IBTB includes corrosion-resistant, stainless steel mounting hardware and is easily accessible for connection and inspection. The lay-in connection clamp (#6 - #2 AWG, or 16 - 35 mm²) allows easy installation of the grounding electrode conductor in one continuous length, where possible. The polymeric base and housing is impact-resistant, UV-stabilized and meets UL® requirements for weatherability performance.

Features

- Meets the requirements of 2008 NEC® Article 250.94
- cULus® Listed
- Accommodates (5) 14 - 4 AWG (1.5 - 25 mm²) bonding conductors and (1) 6 - 2 AWG (16 - 35 mm²) grounding electrode conductor
- Integral mounting base enables easy installation
- Includes mounting hardware
- Connects to grounding electrode conductor – does not rely on meter base enclosure bonding connection
