We Asked. We Listened. We Innovated.

ANOTHER ROAD TO CADDY INNOVATION
We asked electrical contractors what problems they face and how CADDY innovation can help meet their needs. We listened to what they do today and heard a consistent message: Find a better way to mount, wire and install electrical devices, such as switches and outlets, on the job or offsite. Then the CADDY team designed and built ONE system that meets many of the different installation methods and preferences of today's electrical contractor.
CADDY ALL-IN-ONE electrical assemblies combine the electrical box, support bracket, mud ring, far-side support and ground wire pigtail into a single solution that is ready to use right out of the box. The system provides the contractor with the flexibility to wire from the front or the back of the assembly. The open-back design allows for easier access when installing conduit connectors or multiple circuits. Models are available with integrated, removable or without mud rings and, unlike many other solutions, the unit stays fixed in place when the mud ring is removed. The CADDY ALL-IN-ONE system includes stud-mounted, between-stud and floor-mounted solutions.

This unique system offers electrical contractors fewer components, better access for wiring, and may be purchased as standard inventory from stocking CADDY distributors.

Features

- Complete assembly that is ready to use right out of the box and installs with just two screws
- Open-back design offers faster and easier access to install conduit connectors or wiring
- Box remains fixed in place when mud ring is removed (on applicable models)
- Rigid back plate functions as a far-side support and is resistant to bending
- Stocked inventory – available when you need it
- Made in the USA

www.erico.pentair.com
CADDY ALL-IN-ONE stud-mounted electrical assemblies are a fast and easy way to mount, wire and install outlet and switch assemblies to metal studs with just two screws. Part of the innovative CADDY ALL-IN-ONE product family, this solution combines the electrical box, support bracket, mud ring, far-side support and ground wire pigtail into ONE unit. The open-back design provides greater access to the box interior, making the installation of conduit connectors and wiring for multiple circuits faster and easier. CADDY ALL-IN-ONE stud-mounted electrical assemblies are available in single- or double-gang and with a number of mud-ring configurations that meet the needs of most stud-mounted applications.

Features

- Complete assembly that is ready to use right out of the box and installs with just two screws
- Open-back design offers faster and easier access to install conduit connectors or wiring
- Mounts to either side of the stud
- Repositions to other stud side without redoing knockouts or rotating devices
- Versatile back plate functions as rigid far-side support or additional stud attachment
- Assembly mounts tight to stud, making it easier to pull and install wiring
- Available in single- or double-gang
- Available with integral mud ring, removable mud ring or without mud ring
- Made in the USA
CADDY ALL-IN-ONE Stud-Mounted With Integral Mud Ring

Features

- Ingenious design combines box, support bracket and mud ring into a single, integrated unit
- Fewer parts makes the installation faster and easier
- Center marks provide easy height positioning
- Includes multiple 1/2” and 3/4” knockouts on each side of the box
- Made in the USA

CADDY ALL-IN-ONE between-stud electrical assemblies are a fast and easy way to mount, wire and install outlet and switch assemblies between metal studs with just two screws. Part of the innovative CADDY ALL-IN-ONE product family, this solution combines the electrical box, telescoping support bracket, mud ring, far-side support and ground wire pigtail into ONE unit. The open-back design provides greater access to the box interior, making the installation of conduit connectors and wiring for multiple circuits faster and easier. CADDY ALL-IN-ONE between-stud electrical assemblies are available in single- or double-gang and with a number of mud-ring configurations that meet the needs of most between-stud applications.

Features

- Complete assembly that is ready to use right out of the box and installs with just two screws
- Box moves side-to-side for exact positioning
- Open-back design offers faster and easier access to install conduit connectors or wiring
- Telescoping bracket accommodates up to three boxes
- Rigid back plate functions as a far-side support and is resistant to bending
- Available in single- or double-gang
- Available with integral mud ring, removable mud ring or without mud ring
- Made in the USA

CADDY ALL-IN-ONE floor-mounted electrical assemblies are a fast and easy way to mount, wire and install outlet and switch assemblies to stud wall floor track with just two screws. Part of the innovative CADDY ALL-IN-ONE product family, this solution combines the electrical box, support bracket, mud ring, far-side support, integrated first means of support and ground wire pigtail into ONE unit. The open-back design provides greater access to the box interior, making the installation of conduit connectors and wiring for multiple circuits faster and easier. CADDY ALL-IN-ONE floor-mounted electrical assemblies are available in single- or double-gang and with a number of mud-ring configurations that meet the needs of most floor-mounted applications.

Features

• Complete assembly that is ready to use right out of the box and installs with just two screws
• Open-back design offers faster and easier access to install conduit connectors or wiring
• Provides versatile positioning - independent of wall stud location
• Mounts inside (use mounting tabs) or under floor track
• Integrated first means of support accepts conduit or MC/AC cable
• Rigid back plate functions as a far-side support and is resistant to bending
• Finder tab helps locate electrical box behind drywall
• Available in single- or double-gang
• Available with integral mud ring, removable mud ring or without mud ring
• Made in the USA
CADDY ALL-IN-ONE Floor-Mounted With Integral Mud Ring

Features

• Ingenious design combines box, support bracket and mud ring into a single, integrated unit
• Fewer parts makes the installation faster and easier
• Preset to a finish height of 18” from the floor (adjustable 12” or 15”)
• Integrated first means of support accepts conduit or MC/AC cable
• Accommodates additional CADDY ALL-IN-ONE box assemblies, support brackets and low-voltage mounting plates
• Includes multiple 1/2” and 3/4” knockouts on each side of the box
• Made in the USA
